TECHNICAL SKILLS

Languages: Java, JavaScript, Python, SQL, TypeScript

Frontend: HTML, CSS, React, Redux, Jest, Single SPA, Microfrontends

Backend: Spring Boot, Quarkus, GraphQL, REST APIs, Microservices Architecture

AI / ML: LangChain, LangGraph, ChromaDB

Tools & DevOps: Docker, GitHub Actions (CI/CD), Git

Practices: Agile, OOP, DSA, Unit Testing, Responsive Web Design

WORK EXPERIENCE

Hitachi Energy

May 2025 – Present

Software Developer (Contract via Equiliem)

- Develop and maintain full-stack features using React (TypeScript) with Java and Python backend services.
- Build and enhance backend APIs and application workflows supporting energy settlement operations.
- Write unit tests, troubleshoot application issues, and contribute to reliable production-ready software.

Software Developer Intern

- Built full-stack features using React (TS) and Java/Python backend APIs.
- Implemented secure authentication and role-based access control using Keycloak.
- Developed Python modules with validation and testing for energy settlement workflows.

University of Houston

Jan 2025 – May 2025

Research Assistant

- Built RAG-based LLM applications using LangChain, LangGraph, and OpenAI APIs.
- Designed multi-agent workflows for retrieval and reasoning using AutoGen.
- Implemented vector search using ChromaDB with OpenAI and Hugging Face embeddings.

Zemoso Technologies

March 2022 – Aug 2024

Software Engineer I

- Developed scalable frontend systems using React, TypeScript, and micro-frontends.
- Integrated backend APIs and real-time features including Google Maps services.
- Improved reliability and maintainability through code reviews and collaboration.

Associate Software Engineer

- Built full-stack features using React, Spring Boot, and GraphQL APIs.
- Optimized build performance (Webpack) to improve load time and responsiveness.
- Mentored junior developers and contributed to internal engineering tools.

Dev Intern

- Developed authentication flows and microservices using React and Spring Boot.
- Refactored UI components to improve performance and usability.
- Collaborated in agile teams to deliver tested and maintainable features.

PROJECTS

Fairness-Aware Income Classification

- Built supervised ML models including Logistic Regression, Decision Trees, Random Forests, and Neural Networks.
- Applied bias mitigation using AIF360 and Fairlearn across machine learning pipeline stages.
- Evaluated accuracy-fairness trade-offs using AUROC and Equalized Odds metrics.

Model Deployment on AWS SageMaker

- Trained and deployed ML model using SageMaker with S3-backed data pipelines.
- Built React interface with APIs for real-time inference.
- Tested and validated end-to-end model performance in production-like environment.

EDUCATION

Master of Science in Computer Science

GPA: 3.73/4

University of Houston

May 2026

Bachelor of Technology in Electronics and Computer Engineering

GPA: 9/10

Sreenidhi Institute of Science and Technology

June 2022

CERTIFICATIONS

AWS: AWS Certified Cloud Practitioner (CLF-C02), AWS Certified Developer - Associate (DVA-C02)

Swayam: Programming in Java, Data Structures and Algorithms using Python, Python for Data Science
