EDUCATION

Master of Science in Computer Science

University of Houston

GPA: 3.7/4

Expected May 2026

Bachelor of Technology in Electronics and Computer Engineering

Sreenidhi Institute of Science and Technology

GPA: 9/10

June 2022

SKILLS

Programming Languages: Java, JavaScript, Python, SQL

Core Concepts: Data Structures and Algorithms, OOP, Functional Programming

Frontend : HTML, CSS, React, TypeScript, Redux, Jest, Single SPA, Microfrontends

Backend : Spring Boot, Quarkus, GraphQL, REST APIs, Microservices Architecture

Tools & DevOps: AWS Sagemaker, AWS S3, Docker, GitHub Actions (CI/CD), Git, Postman

Additional Skills: MySQL, Responsive Web Design, Agile Methodologies, Storybook, Material UI

WORK EXPERIENCE

Hitachi Energy

May 2025 – Present

Software Developer Intern

- Built reusable, configurable React components using TypeScript.
- Developed backend APIs using Java, Python, and Quarkus.
- Integrated Keycloak for authentication and role-based access control.

University of Houston

Jan 2025 – May 2025

Research Assistant

- Built RAG pipelines using LangChain, LangGraph, and AutoGen with OpenAI APIs.
- Developed multi-agent LLM systems with tool-enabled agents.
- Implemented vector search with ChromaDB using OpenAI and Hugging Face embeddings.

Zemoso Technologies

March 2022 – Aug 2024

Software Engineer 1

- Built scalable front-end features using React, TypeScript, and Single SPA.
- Integrated Google Maps APIs and graphs for real-time data visualization.
- Improved code quality through reviews and ensured seamless back-end integration.

Associate Software Engineer

- Developed frontend features with React and backend APIs using Spring Boot and GraphQL.
- Optimized webpack configurations, reducing load times and improving performance.
- Contributed to open-source projects and mentored bootcamp participants.

Dev Intern

- Developed login pages and microservices for bootcamp projects using React and Spring Boot.
- Refactored UI components to improve performance and user experience.
- Gained hands-on experience in full-stack development and agile methodologies.

PROJECT EXPERIENCE

Retrieval-Augmented Generation (RAG) System

- Developed an AI-powered document retrieval system using ChromaDB and vector embeddings.
- Implemented query pipelines with LangChain and LangGraph for contextual processing.
- Designed a modular framework to support multi-document AI-driven responses.

Model Deployment on AWS SageMaker

- Configured AWS S3 for data storage and trained logistic regression model on SageMaker.
- Built React web application for model interaction with real-time API endpoints.

Full-stack Application Inspired by Medium.com

- Designed and managed MySQL database, integrated OAuth2 authentication for secure user access.
- Implemented filtering, like/dislike functionality, and commenting for user engagement.

CERTIFICATIONS

AWS: AWS Certified Cloud Practitioner (CLF-C02), AWS Certified Developer - Associate (DVA-C02)

Swayam: Programming in Java, Data Structures and Algorithms using Python, Python for Data Science

Coursera: Python for Everybody
