TECHNICAL SKILLS

Languages: Java, JavaScript, Python, SQL, TypeScript

Frontend: HTML, CSS, React, Redux, Jest, Single SPA, Microfrontends

Backend: Spring Boot, Quarkus, GraphQL, REST APIs, Microservices Architecture

AI / ML: Supervised/Unsupervised Learning, LangChain, LangGraph, ChromaDB

Tools & DevOps: Docker, GitHub Actions (CI/CD), Git

Practices: Agile, OOP, DSA, Unit Testing, Responsive Web Design

WORK EXPERIENCE

Hitachi Energy

May 2025 – Present

Software Developer Intern

- Built configurable React/TypeScript UI components and Java/Python backend APIs.
- Integrated Keycloak for authentication and role-based access control.
- Implemented energy settlement formulas in Python with documentation and testing.

University of Houston

Jan 2025 – May 2025

Research Assistant

- Built RAG pipelines using LangChain, LangGraph, and AutoGen with OpenAI APIs and prompt engineering.
- Implemented vector search with ChromaDB using OpenAI and Hugging Face embeddings.
- Contributed to a research paper on multi-agent LLM systems and RAG pipelines.

Zemoso Technologies

March 2022 – Aug 2024

Software Engineer I

- Built scalable front-end features using React, TypeScript, and Single SPA micro-frontend architecture.
- Integrated Google Maps APIs and interactive charts for real-time data visualization.
- Conducted code reviews to maintain quality standards and ensured seamless back-end integration.

Associate Software Engineer

- Developed frontend features with React and backend APIs using Spring Boot and GraphQL.
- Optimized webpack configurations, reducing load times and improving performance.
- Mentored bootcamp participants and contributed to open-source projects.

Dev Intern

- Developed login pages and microservices using React and Spring Boot.
- Refactored UI components to improve performance and user experience.
- Gained hands-on experience in full-stack development and agile methodologies.

PROJECTS

Retrieval-Augmented Generation (RAG) System

- Built an AI-powered document retrieval system using ChromaDB and vector embeddings.
- Implemented query pipelines with LangChain and LangGraph for contextual processing.
- Designed a modular framework to support multi-document AI-driven responses.

Model Deployment on AWS SageMaker

- Configured AWS S3 for data storage and trained a logistic regression model on SageMaker.
- Built a React web application for model interaction with real-time API endpoints.
- Deployed and tested inference endpoints to validate end-to-end model performance.

Full-Stack Application Inspired by Medium.com

- Designed and managed a MySQL database with OAuth2 authentication for secure user access.
- Implemented filtering, like/dislike functionality, and commenting for user engagement.
- Built responsive UI with React ensuring consistent experience across devices.

EDUCATION

Master of Science in Computer Science

GPA: 3.73/4

University of Houston

May 2026

Bachelor of Technology in Electronics and Computer Engineering

GPA: 9/10

Sreenidhi Institute of Science and Technology

June 2022

CERTIFICATIONS

AWS: AWS Certified Cloud Practitioner (CLF-C02), AWS Certified Developer - Associate (DVA-C02)

Swayam: Programming in Java, Data Structures and Algorithms using Python, Python for Data Science
